Journal of Smart Processing
Vol. 14 No. 5 2025 (September 2025)

CONTENTS

Advanced Additive Manufacturing Technology and Applications（Ⅱ）

S.P.S.Announcement N19

Preface of Feature Article
Advanced Additive Manufacturing Technology and Applications（Ⅱ）
Soshu KIRIHARA and Takayoshi NAKANO..... 199

Feature Articles
Review Articles
Digital Twin Science Powder Bed Fusion（PBF）Type Additive Manufacturing for Creation of Materials
Yuichiro KOIZUMI, Masayuki OKUGAWA, Yuhen LIU and Takayoshi NAKANO..... 200

Feedback Control of Heat Accumulation Induced by Part Geometry in Laser Powder Bed Fusion
Masahiro KUSANO and Makoto WATANABE..... 208

Environmental Adaptability of Ceramic Dental Materials Fabricated by Stereolithography
Fiona SPIRRETT and Soshu KIRIHARA..... 214

Superimpositional Design of Macroscopic Shapes and Crystallographic Textures via Metal Additive Manufacturing for Anisotropy in Mechanical Functions
Takuya ISHIMOTO and Takayoshi NAKANO..... 221

Fabrication of Cultivated Beef Meat with Fat Marbling Structures Using 3D Printer and Construction of Automatic Instrument
Michiya MATSUSAKI..... 227

Blue Diode Laser Additive Manufacturing for the Realization of a Carbon-neutral Society
Masahiro TSUKAMOTO..... 232

Additive Manufacturing of Ultrasonic Transducers by Composite Layer Laminations and Mechanical Laser Processing -Piezoelectric Micropillars Fabrication for Hydrogen Generations by Effective Electrolysis of Desalinated Seawater by Ultrasonic Separations-
Natsumi TSURUTA, Fiona SPIRRETT and Soshu KIRIHARA..... 238

In-situ Alloying of High Entropy Alloys with Body-Centered Cubic Structure Developed by Laser-Powder Bed Fusion
Ryosuke OZASA, Ozkan GOKCEKAYA and Takayoshi NAKANO..... 243

Regular Reseach Articles
Development of *in vitro* Co-Culture Model for Antibacterial Evaluation of Additively Manufactured Metal Biomedical Implant Materials
Tadaaki MATSUZAKA, Tomoki KOSAKA, Riku YAMANO, Kazuma FUNAOKU, Tian LIU, Aira MATSUGAKI and Takayoshi NAKANO..... 249

Microstructure Formation Behavior of Non-Equiatomic Ti-Nb-Mo-Ta-W High Entropy Alloy by Laser Irradiation for Metal 3D Printing
Ryosuke OZASA, Yong Seong KIM, Kohei ASAKURA, Shohei HORIO, Ryosuke WANIBUCHI and Takayoshi NAKANO..... 253

Changes in Young's Modulus in Metastable β-Type Ti Alloys Developed by Laser-Powder Bed Fusion
Keitaro MIYASAWA, Ryosuke OZASA, Akiyoshi UCHISHIBA, Yuta SHIMIZU and Takayoshi NAKANO..... 258

S.P.S.News N21
