

Journal of Smart Processing
Vol. 10 No. 6 2021 (November 2021)

CONTENTS

異種・異材×接着・接合技術が拓く未来

S.P.S. Announcement	N23
Preface	Miki MORI327
Reviews	
Adhesion Technology for Dissimilar Materials Joining	Chiaki SATO328
Biomimetic Reversible Interconnect Design	Naoc Hosoda333
Metal / Plastic Dissimilar Material Joining Technology and International Standardization	Masami ITABASHI338
The Film-formed Adhesive Material for the Semiconductor Assembly Contributing to the Development of New Products	Isao ICHIKAWA344
Research Papers	
Controlling Size and Similarity of Anodic Porous to Reveal Joining Mechanism of Injection Molded Direct Joining	Fuminobu KIMURA, Hao CHANG, Weiyang CHEN and Yusuke KAJIHARA351
Deterioration Behavior of Epoxy Resin for Electronics Packaging and Its Adhesive Joint with Ni by Water Absorption	Hironao MITSUGI, Riku SUZUKI, Ikuo SHOHJI and Tatsuya KOBAYASHI359
Investigation of Mechanical Properties of High <i>T_g</i> Epoxy Resin Material	Xinya ZHAO, Hironao MITSUGI, Ikuo SHOHJI and Tatsuya KOBAYASHI365
General Thesis	
Dross Formation Process During Gas Cutting Using Three-Dimensional Particle Simulation	Hisaya KOMEN, Tomohiro SUGAI, Masaya SHIGETA, Manabu TANAKA, Takashi KATO, Yuichiro KITAMURA and Toyoyuki SATO373
S.P.S. News	N27
