CONTENTS

Special Issue on 30th Symposium on “Microjoining and Assembly Technology in Electronics” (Mate2024)

**S.P.S. Announcement** ..... N19

**Preface of Feature Article**

Special Issue on “Mate2024”

Akira YAMAUCHI.....219

**Feature Articles**

**Regular Research Articles**

Development of an Extremely Small Power Chip Size Package  
for Wide Bandgap Power Semiconductors and Its Evaluation and Analysis

Hiroki TAKAHASHI, Keita SUZUKI, Akira KITAMURA,  
Tetsuo ENDOH and Yoshikazu TAKAHASHI.....220

Research on Thermal Resistance Reduction for High Heat Dissipation Microprocessor  
with Chiplets

Koji NISHI.....226

Rough Copper Plating Surface on Lead Frame  
by Using Periodic Reverse Pulse (PR Pulse) Electrolysis

Ryota NAKA, Junji YOSHIKAWA, Takao ISHIHARA and Kozo OONO.....233

Evaluation of Metal/Resin Interface in Semiconductor Packages Using the Method  
of Predicting Delamination at Dissimilar Material Interfaces

Keiichiro MATSUO, Haruka KUBO, Tetsuya YAMAMOTO,  
Kyo TANABIKI and Toru IKEDA.....240

Conductivity Improvement of Electrically Conductive Adhesive Using Tin-Coated Copper  
with Sn-3.0Ag-0.5Cu Bridging

Michiya MATSUSHIMA, Kotaro TANIYAMA,  
Takumi SENDA and Shinji FUKUMOTO.....246

Influence of Bi Concentration on the Deformation Behavior of Sn-Bi Alloys

Akira YAMAUCHI and Masashi KUROSE.....253

**Special Report for Mate2024**

Report on 30th Symposium on “Microjoining and Assembly Technology in Electronics”  
(Mate2024)

Yoshiharu IWATA.....257

**General Article**

**Regular Research Article**

Study on Penetration Increase Mechanism of TIG Welding Using External Magnetic Field

Shoichi MATSUDA, Yasushi TANAHARA, Hisaya KOMEN,  
Yuki KOBAYASHI and Manabu TANAKA.....261
