

**Journal of Smart Processing**  
Vol. 7 No. 5 2018 (September 2018)

CONTENTS

樹脂と金属の異相界面科学が切り拓く電子デバイスの未来

**S.P.S. Announcement** ..... N19

Preface.....Shinji KOYAMA..... 171

**Reviews**

Development of a High Reliability Power-module Substrate via New Bonding Process  
Using Ag Free Bonding Material  
Nobuyuki TERASAKI..... 172

Cases Where Adhesion Strength between Organic Matter and Inorganic Matter  
Greatly Affect Product  
Keiichi TANAKA..... 176

**Research Papers**

High  $T_g$  and High Thermal Conductivity of Multifunctional Mesogenic Type Epoxy Thermosets  
Miyuki HARADA and Yuka FUJIWARA..... 179

Characterization of Organic/inorganic Interface in Electrically Conductive Adhesives  
Using Time-domain NMR Spectroscopy  
Masahiro INOUE and Tomohito NEGISHI..... 184

Effect of Characteristic of Resin on Coalescence Behavior of Solder Fillers in  
Self-Organization Assembly Method  
Yusuke UENO, Shinji FUKUMOTO,  
Michiya MATSUSHIMA and Kozo FUJIMOTO..... 192

Influence of Curing Temperature to Electrical Reliability of a Phenolic-based  
Adhesive Containing Copper Particles Treated with an Aliphatic Polyamine  
Kenta KAWARAI and Masahiro INOUE..... 199

**General Thesis**

Friction Welding of Non-Heat-Treatable Aluminum Alloy 5083-O  
with High Frequency Induction Heating  
Takashi NAKAMURA, Tsuyoshi FURUSHIMA, Eitaro YUKUTAKE,  
Satoru UEDA, Masatoshi ENOMOTO and Itaru NISHIZAKI.....207

**S.P.S. News** ..... N21
