CONTENTS

3次元造形プロセスにおける技術的進化の加速と学術的方向性の多様化

S.P.S. Announcement	N23
Preface	Soshu KIRIHARA..... 215
Reviews	
Current Status of Metal Additive Manufacturing and Microstructure Control of Metal Parts in Powder Bed Fusion (PBF) Yuichiro KOIZUMI, Kenta YAMANAKA, Kenta AOYAGI and Akihiko CHIBA.....	216
Materials Tectonics Technology and Stereolithographic Additive Manufacturing Soshu KIRIHARA.....	223
Crystallographic Texture Formation of Beta-type Ti-15Mo-5Zr-3Al Alloy Through Selective Laser Melting Takuya ISHIMOTO, Junpei YASUTOMI, Shota SUGIMOTO and Takayoshi NAKANO.....	219
Stereolithographic Additive Manufacturing of Fluctuated Patterns for Streamline Modulations in Water Flows Hirotoshi NOZAKI and Soshu KIRIHARA.....	233
Design and Fabrication of Sound Absorption Structures for Thermal Spraying by Using Stereolithographic Additive Manufacturing Shoichiro KISANUKI and Soshu KIRIHARA.....	238
General Thesis	
Behaviors of Cathode Spot in Alternative Current Helium TIG Welding of Aluminum Huy Le PHAN, Shinichi TASHIRO, Van Hanh BUI and Manabu TANAKA.....	243
Optimization of Sintering, Cold-forging and Carburizing Processes to Improve Toughness and Fatigue Strength of Sintered Mo-Alloyed Steel Yuichiro KAMAKOSHI, Ikuo SHOHJI, Noriko INOUE and Shunji FUKUDA.....	251
Alloying Property of a Conductive Filler to Resolve the Re-melting Issue Kaoru SUGIMOTO, Tomohisa YAGI, Hideo HONMA and Mitsuhiro WATANABE.....	260
Bonding Condition Evaluation using a Melting-Point-Change Type Conductive Paste Kaoru SUGIMOTO, Tomohisa YAGI, Hideo HONMA and Mitsuhiro WATANABE.....	266
